Burton Safes is a specialist supplier of **Physical Security Solutions** including Safes, Strong Rooms, Security Doors and Access Control Systems. We cover the whole of the UK and have representation in parts of Europe, the Middle East, East Africa and Asia.

We have a large range of products available from stock and we also produce custom made solutions to order. We believe passionately in having our products independently tested and certified to UK and European standards by internationally recognised institutions.

Burton Safes offer a minimum warranty of 2 years in respect of materials and workmanship. UK consumers benefit from an extended 5 year warranty and where the 'Safe for Longer' symbol is shown, a free replacement in the event of burglary and where applicable, a fire.*

**See the warranty section of our website for full terms and conditions*

Unless otherwise stated all dimensions are in mm, in the order **H x W x D**. All weights and dimensions are approximate and are often rounded to the nearest 5kg/mm. E&OE

The cash ratings given in this brochure are a guide. Some insurance companies may apply higher or lower ratings.

The flame symbol is **only** used on products that have been **independently tested and certified** as offering specific fire protection.

For a detailed explanation of standards see page 120 or visit our website for more information. www.burtonsafes.co.uk

Home Safes

Our Home Series are the perfect security furnishing for any residence. With products ranging from £10k jewellery rating to £350k jewellery rating there is something for every need. All safes from £40k valuables rating are certified by internationally recognised test houses and are validated in the UK by the **Association of Insurance Surveyors**, providing peace of mind when storing those treasured possessions.

Safe for Longer - The Burton home series provides consumers with a 5 year warranty and a **FREE REPLACEMENT** if the safe is damaged in the event of a burglary.*

**See the warranty section of our website for full terms and conditions*

For those prized possessions Burton Safes are **The Sure Defence®**

High Security Safes

From £100k jewellery rating, to Europe’s Highest security safe, providing £2.5M jewellery rating; all of our high security products are independently tested and certified by internationally recognised test houses and validated by the **Association of Insurance Surveyors**.

At Burton Safes we work on some of the world’s most secure sites. That experience filters into our products and the benefits reach you. Our range contains models with features such as double walled steel products with ultra-high performance concrete, **certified fire protection**, relocking devices, glass plates, and special drill protective elements for the lock and bolt work.

We deliver key and electronic locking solutions, including the use of the latest biometric technology. Our locking solutions include features such as alarm and CCTV integration, dual user entry, time delays and windows, duress codes, temporary and one user time codes to name a few. We also have a wide range of optional extras to provide for every eventuality, whether that be jewellery inserts or additional shelves.

Features

- Independently tested and certified to EN 1143-1 Grade 3 by ECBS

Wall & Underfloor Safes

Our range of Wall and Underfloor safes provide a concealed option to protecting cash, documents and valuables. From deterring thieves and satisfying insurance requirements, to providing protection from flood damage.

Installing a Wall or Underfloor safe can help where space is a premium or where security and peace of mind of a hidden safe is desired.

Our wall safes are ideal for operating at head level and keeping away from ground level should flooding be a risk. With a £4k cash, £40k valuables and £6k cash and £60k valuables options we should have you covered.

The Sotto underfloor safe is unique by providing an adjustable telescopic depth adjustment, stylish dust cover lid and recommended £4k cash and £40k valuables cover. The Oculito underfloor safe is supplied with a high quality water-tight lid, steel mesh neck with a recommended £17.5k cash and £175k valuables cover.

Fire Safes

Our Fire Safes are **The Sure Defence®** against fire damage. Our fire safe range can protect documents and data for an hour in temperatures of up to 900°C. Don't just protect your valuables against fire, secure them within double walled steel structures filled with fire and security composite.

Furthermore, these models can offer optional fittings making them specific to your requirements; mechanical combination, electronic PIN or, the advanced biometric locking system; adjustable shelves and an option of pull-out shelves, hanging frame and lockable coffer.

The range offers safes that are tested and certified to EN15659 LFS 60P by ECBS (world renowned German accreditation body) and NT Fire 60DIS-120DIS. If you require fire protection for your safe, you should only purchase products that have been **independently** tested and certified.

Gun Safes & Cabinets

The Gun Safe range is suitable for shot guns or rifles and accommodates most models with scopes and silencers fitted. Secure store your guns in high security gun cabinets that are made to the Police Preferred Specification under the Secured by Design scheme.

These models are ideal to secure a gun collection, with high density foam gun holders and base, holders for cleaning rods and ammo belts, internal lockable ammo box and optional sideshelf for other valuables. Furthermore, this range has a choice of locking options: single key, mechanical combination, electronic PIN, or biometric locking system.

NEW - Our Pioneer and Warden LFS models have been tested and certified to the Sold Secure Firearms Cabinets Standard SS302:2020.

Features

- Tested and certified to Firearms Cabinets SS302:2020 – Bronze by Sold Secure
- Police Preferred Specification
- Lockable ammunition compartment
- Double-bitted key lock
- Suitable for both shotguns and rifles
- Foam gun holders and Internal carpet
- 5 Gun and 10 gun options available

Hotel Safes

The Hotel Safe range has a simple locking system that can be used with complete ease and by multiple users. These models have display screens, back lit buttons and audible sounds to easily guide users through their operation.

The guests can choose a 3-6-digit code; few enough digits to prevent guests forgetting, whilst also being secure. In the case of a guest forgetting or, if the batteries in the lock run out: this range features an override emergency key and master code.

This range of products can also be ideal for student accomodation, Airbnb and domestic use.

Key Safes

The Key Safe range is the perfect security solution for securing and storing keys. This range includes Keyguard allowing authorised access to carers, cleaners, workmen, dependents, holiday lets, and key cabinets designed for use in showrooms, garages, universities, schools and large commercial sites.

We provide products that answer a variety of requirements: UK Police Preferred Specification under the Secured by Design scheme, and the Keyguard Digital XL is certified to LPS1175 (Issue 8) A3.

LPS1175 Issue 8 is an independent attack test certification. A tool list is selected and then time given to withstand a physical attack. Keyguard XL is the first key safe to achieve this level.

LPCB is part of the BRE Group, the world renowned certification and testing facility who test and certify products to the very latest attack methods.

Keyguard Digital

Features

- Superior push button key safe
- 12 button design

Retail Safes

Deposit safes have become a necessity for businesses as hold up situations and internal fraud have become an increasing threat. Some of these safes have been independently tested and certified to EN1143-2 by ECBS.

Having a separate deposit drawer means staff can deposit cash/valuables without having access to the main safe. Both the drawer and the safe door are fitted with separately operated high security locks. These models have optional locking including mechanical combination, electronic PIN or advanced biometric locking systems.

- Blocks all signals from cards, key fobs and phones
- Blocks GPS tracking
- Expertly tested to a 99% success rate
- Double stitched reinforced seams
- Spare pouch

(HxW) 190mm x 115mm

Locking

At Burton Safes we have a **huge** range of locking options. See page 78 for full details on our recommended models.

With the original design concept of being 'Easy to use' the KABA Axxessor USB delivers a huge range of functions, via a simple visual input unit. One interesting feature is the DURESS function. This facility enables the lock to be connected to an alarm system, activating a silent signal to a remote monitoring station or to the Police when the user is under 'duress' by entering a slightly different code – this can also trigger a time delay if programmed.

Kaba Axxessor USB

- Duress Code
- 18 Users
- Time Delay
- Time Lock Periods
- Battery Powered
- Clear Display
- Dual / 4 Eye Function
- Audit Trail of 10,000 events
- Alarm Connection
- Wrong Try Lockout (4 false attempts)
- Tamper Function
- Holiday Periods

The KABA Axxessor USB is one of the most efficient and reliable locks on the market – suitable for domestic and commercial use, contact the office for a full description and to discuss your locking needs.

INSYS flex ID

A flexible locking system for security containers like gun cabinets, safes, secure cabinets or entry and access doors. Access takes place contactlessly via RFID card or RFID tag. Stand alone or with a state of the art software system, Elocomm, for programming, control and audit. The Flex brings full access control functionality to your secure storage needs.

- High-quality motor lock and compact RFID reader unit
- Easy, quick opening via RFID card/RFID tag
- Easy enrollment of additional users without configuration software and keypad
- Adding of up to 99 additional cards/tags possible
- Manipulation blocking and automatic locking
- Emergency power supply
- Time delay, dual code and external release/blocking (only EloStar® flexID multi)

SAFE LOCKS

We have strategic partnerships with **Insys** and **Kaba**, ensuring that we can provide solutions for the most demanding of commercial environments - **CvIT**, banking and large retail estates. Contact our commercial team for more information **+44 (0) 1484 663388**

Below are some of the more popular models but please enquire if you have a specific need and we will find a lock to suit your needs and budgets.

Vaults & Strongrooms

79

Safe Lock Terminology

Users – Unique individual's code that can be controlled by a "Master" or "Manager".

Dual user - If Dual user mode is set in your safe it will require two different user codes to open the lock. This means two people will need to be with the safe to open it – This helps prevent internal fraud.

Courier code - Courier codes are generally used by CViT (cash and valuables in transit) to bypass any time delay settings within the safe and sometimes the time windows.

Duress code – A duress code is a covert distress signal. When you input the code, a silent alarm will be sent to the Police or a monitoring station in the event that you are forced to open your safe. The Duress code can still open the lock to the safe.

One-time code - OTC (one-time code) is a code that can be created and passed to a user to open the safe – once they have used that code it will become invalid. These are often used by CViT (cash and valuables in transit) operators.

Time Delay – A time-delay is a setting that delays the unlocking of the lock by a user-definable period. After entering your code you wait the set time before you enter your code a second time to open the safe.

Time Lock – Weekly programmable timer installed inside, which allows the user to set time intervals that control when the safe opens – i.e. you can open the safe in-between 9am and 5pm but not outside of those hours even if you know the code.

Audit Trail - This logs every event within the safe – Which user opened and closed the safe, at what time. It will never show the code, just the user number i.e. User 2 opened the safe at 2:30pm 30/08/2018.

Biometric Option – Finger print controlled security lock. These locks come with the option of finger print access, code access or both.

Swing Bolt - Once a correct code is entered, the lock is released, allowing the boltwork to move when turning the handle.

Dead Bolt - Once a correct code is entered, the user has to manually move the locking bolt, usually by turning the keypad.

Motorised Bolt - Once a correct code is entered, the lock moves the locking bolt via an electronic motor.

LUXURY &
DESIGN
SAFES

— Lusso —
luxury for all

Embassy Panic Rooms

Our panic room solutions are designed to be lightweight, yet at the same time offering premium attack protection. The special lightweight systems allow us to install in upstairs locations. We also have unique ways of saving on space.

Our project team are experienced in working with the building and design teams so we can offer the security while you create the dream living space and décor within your existing building. The perfect turnkey solution to protect you and your assets.

- 

You will have a dedicated sales manager to work with you to discuss your requirements and find the right solution. Our sales team have a vast knowledge of the security industry and will ensure the solution is right for you.
- 

After detailed discussions to assess your requirements our design team will work on your solution, ensuring it meets the required security level.
- 

Our in-house CAD design team will create drawings of your security solution allowing you to visualise the end result. Once your project is signed off we will begin the manufacturing process.
- 

Each project is handled by a dedicated project manager who will ensure a smooth process and that deadlines are met.
- 

Surveys and installations are carried out by our own engineering team. These are arranged with you in advance by the project manager.

Avertic Armour

Avertic Armour is a highly advanced, state-of-the-art security panel providing ultra-light and effective protection against a range of power tools. It's unique properties allow it to be used across many security solutions such as cash-in-transit vehicles, panic room construction, military out buildings, secure room dividers, roller shutters and many more.

Example of vehicle panel construction

NEW
PRODUCT

Features

- Designed to withstand attacks from drills, chainsaws, reciprocating saws, concrete cutters and grinders
- Increase the security of armoured vehicles, security walls, security doors, safes, rollershutter and many more security solutions
- Can be used in domestic or commercial properties
- Panels can be cut to any size or shape to meet your requirements
- Space saving solutions as panels are only 5-10mm thick
- Minimal weight increase with panels at just 1 - 1.5kg/pm²
- Easy to apply, and install
- Can be installed as part of manufacture or as a retro fit solution
- 4 different security levels to suit your security needs

Example of secure room wall construction

The Avertic Armour Panel is available in 4 different security levels:

Anti-Drill	Contains 8 layers of protective material and provides 18V drill protection
Power	Contains 6 layers of protective material and 2 layers of the anti-cut material. It can provide protection against a concrete cutter, chainsaw and 800w grinder
Power+	Contains 4 layers of protective material and 4 layers of the anti-cut material. This product protects against a 1100W grinder, reciprocating saw, concrete cutter and chainsaws
Extreme	The most secure level of this product, contains 2 layers of protective material and 6 layers of the anti-cut material. This level protects against a 2300W grinder, reciprocating saw, concrete cutter and chainsaws

Tailored versions are available to suit security requirements

Orthrus Strongrooms

A freestanding high security solution of modular construction, Orthrus delivers optimum price/performance ratio. It is certified to the very latest LPS standard – LPS1175: Issue 8 and has achieved security rating F10/G5. Each room is built to order according to the individual size and security requirements of the client. The flexibility of design and build allow this to be the perfect solution in the commercial world for high value items or indeed military/government use for sensitive materials or meeting spaces.

Features

- Freestanding high security safe room
- Modular construction to create bespoke rooms built to your specification
- Independently tested and certified to LPS1175 (Issue 8) F10/G5
- Ideal solution for creating a secure space within an existing structure
- Ideal for commercial, military and government use
- Exceeds requirements of the UK Environment Agency for the storage of radioactive source material/equipment
- Panel widths range from 150mm to 1500mm
- Rooms can be 5 or 6 sided
- Design, consultancy service and intallation provided by Burton Safes
- The door and locking system can be connected to client's own alarm system and access control system
- A 2nd or 3rd lock can be added to your vault door if required
- Lock features 4 manager codes, 36 user codes, time delay and time windows, dual user functions and audit trails
- Optional emergency door is available

THE SURE DEFENCE RANGE

Locking Options:

Vienna Safe Deposit Boxes

Features

- A range of high quality safe deposit boxes with high security locks and advanced software options
- Ideal for use in banks and safe deposit centres
- 6mm steel door
- Stainless steel facia
- Choice of dual key or key and electronic locking system
- Electronic system offers increased security through permanent monitoring of the door status. Unauthorised entry and tampering will trigger alarms
- Electronic system offers the option of a 'self service system'. Reducing running costs for banks and safe deposit centres
- Vienna Safe Service 6.0 offers the most advanced safe deposit management system on the market - control multiple centres, control day gates and interlocks, monitor box status, record client accesses, set up billing functions and run invoicing
- Key locking systems offer a choice of security levels and lock types to suit different budgets
- Plastic inner cassettes as standard with most box sizes
- Also available in different colour options below the stainless steel facia

Box Size Internal dimensions

1	48.5 x 265 x 413
2	98.5 x 265 x 413
3	148.5 x 265 x 413
4	198.5 x 265 x 413
5	248.5 x 265 x 413
9	448.5 x 265 x 413
10	498.5 x 265 x 413

9W	448.5 x 575 x 413
10W	498.5 x 575 x 413

Industry leading self-service software system option available

Locking Options:

Vaduz Safe Deposit Box System

State-of-the-art safe deposit system increasingly used by banks to reduce running costs and offer customers increased access to their deposit boxes. No staff are required for operation of the system and the vault always remains secure. Full design and consultancy is provided by Burton Safes, contact us for more information.

Tower dispense system

Features

- 24/7 Self service safe deposit system
- Solid steel lockers
- Lockers come in 4 sizes; 50-230mm (H) x 240mm (W) x 360mm (D)
- Vaults certified to EN 1143-1
- Dispense lockers through the wall at ground floor level or via a tower dispense system
- Space saving - two lockers can be stacked one behind the other
- Planning, design, installation and maintenance provided by Burton Safes
- Software for administration and control of safe deposit system
- Spare parts guarantee for 10 years

Locking Options:

PIN

BIOMETRIC

Example of Vaduz vault and safe deposit box construction

Zurich Safe Deposit System

Features

- Upgrades key locking safe deposit systems to a self service electronic operation
- Reduces staffing costs
- Increase security levels with permanent monitoring of the box status
- Alarms can be generated in the event of unauthorised access
- Simple and quick upgrade with minimal down time
- No need to open boxes to fit the system
- Wireless communication avoids damaging/disrupting the existing room
- Cheaper and less disruptive than changing your boxes to new electronic models

Locking Options:

Bespoke Security Solutions

Burton Safes can cater to any need.
We can provide you with any physical security solution you may need from bespoke commercial safes, interlocking pods, security doors and grilles.

Examples of what we can provide are:

- Intelligent key cabinets
- Data rooms
- Hostile vehicle mitigation
- Specialist access control and locking solutions

For bank and retail equipment:

- Cash trolleys
- Security vision windows with audio
- Night pay system
- ATM protection
- Pass through trays and audio units
- Window film

For secure enclosures we can provide high security interlocking pods for controlling the flow of people through space, Transporta (high security container) and Ares (mobile ballistic walling system).

Call us to discuss your unique needs!

Burton Higiene

Features

- Hands free dispenser
 - Manual operation - no power needed
 - Designed to adapt to mutiple bottle sizes*
 - 4mm thick steel non-slip base
 - Stainless steel foot pedal
 - Designed to be secured to a concrete floor
- Height 128 - 300mm Diameter 40mm - 108mm

Model	External	Weight
Higiene	200 x 420 x 370	11 kg

WE
ARE
OPEN

Burton Safes will remain open for business as usual throughout national lockdown.

We have taken extra safety measures and can provide a COVID secure installation to ensure your safe is secured in your home.

What we do...

Burton Safes specialises in the supply, distribution, installation and servicing of **Physical Security Solutions**.

Our Goals

Be the best

Generate sustainable growth

Create a long term legacy

Create a respected and desirable brand

Generate profits for our shareholders and our staff

How we will achieve our goals

Listen to our customers and to the wider market

Deliver a first-rate customer service

Focus on our product quality

Deliver solutions not just products

Seek niche and profitable markets

Create a diverse and first rate supplier network

Constantly assess and challenge our costs, our actions and our performance

Create a stable financial foundation

Our Values

Promote and support the use of independent product testing and certifications

Promote good practice and industry standards

Be honest, fair and respectful in our dealings with customers, suppliers and staff

Help our local community and environment prosper

Be proud of our Yorkshire heritage whilst maintaining an open, global outlook

Create an enjoyable working environment for our staff, with a family atmosphere and ethos

119

Standards

EN14450 - This is a burglary attack test standard for safe cabinets. It largely covers smaller, home safes and cabinets for commercial applications. Safes are attacked using a set list of tools, and scores are given depending on the time taken to make hand holes and larger full size access holes

EN1143-1 - This is a burglary attack test standard for Safes, ATMs and strong rooms. It is the main standard used throughout Europe to assess the security level of safes and it is much more demanding than EN14450. Safes are attacked using a set list of tools, and scores are given depending on the time taken to make hand holes and larger full size access holes. There is a large range of security grades within the standard from 0-XIII. There are also optional tests to prove resistance against core drilling CD and explosives EX

EN1143-2 - This is a very similar standard to EN1143-1 but it is specifically designed for deposit safes and systems. In addition to the normal tests of EN1143-1 there are additional tests to assess the ability to fish items out of the deposit systems. If you are purchasing a certified deposit safe, make sure that it is certified to EN1143-2 and not EN1143-1

EN1047 - This is a very rigorous fire test for safes and data rooms. Safes and subjected to very high external temperatures inside a furnace of approximately 900°C. Internal temperatures are closely monitored with numerous thermo-couples. There are three levels of protection given:

P - Paper documents that will lose data above 170°C

D - Computer media that will lose data above 70°C and humidity above 85%

DIS - Computer media that will lose data above 50°C and 85% humidity.

This particularly tough standard also includes a drop test to simulate a safe falling through a collapsed floor, and a soak out period, where the safe must naturally cool down as it would in a real life situation

EN15659 - This is a similar standard to EN1047 but it does not include the drop test or the soak out period. It is therefore not quite as rigorous. It also only covers protection for paper, not computer data

NT FIRE 017 - A Nordic fire safe standard. Similar to, but not quite as rigorous as EN15659

EN1300 - This is a standard for safe locks. The locks are subjected to various durability and manipulation tests and given one of four grades from A - D. All safes and strongrooms certified to EN14450 and EN1143-1/2 must have a certified lock that reflects the grade of the safe

- EN14450 and EN1143-1/2 Grade 0-II must have 1 lock certified to Class A
- EN1143-1/2 Grade III must have 1 lock certified to Class B
- EN1143-1/2 Grade IV and V must have 2 locks certified to Class B
- EN1143-1/2 Grade VI to X must have 2 locks certified to Class C
- Strongrooms certified to EN1143-1 Grade XI and XII must have 3 locks certified to Class C or 2 locks certified to Class D
- Strongrooms certified to EN1143-1 Grade XIII must have 2 locks certified to Class D

Sold Secure - A burglary attack test covering various products including home safes, cabinets, key safes, gun safes and gun cabinets. They have three ratings of Gold, Silver and Bronze

LPS1175 - This is a British burglary attack test standard, designed and run by LPCB. It covers a number of different physical security products, including doors, windows, grilles, fences, walling systems, key safes and safes. It has 8 Grades from SR1 - SR8

LPS1175 (Issue 8) - From 2019 LPCB designed a new issue of the LPS certification. Requirements for testing and how products are graded has changed from previous issues of the certification. The tool kit used for the test is identified by a letter A-H and the test time in minutes is identified by the number. For example our Keyguard XL is certified to Issue 8 A3, meaning the product can withstand an attack from tool kit A for 3 minutes

EN1627 - This is a European burglary attack test standard for security doors. There are 6 security levels from RC1 - RC6

EN1063 - This is a bullet resistance test for glass. There are 7 levels from BR1 - BR7

EN1522 - This is a bullet resistance test for doors and systems. There are 7 levels from FB1 - FB7. All parts of the door are tested, including door furniture, frames and joints

BS7558 - This is a British standard for gun cabinets. The required threshold to pass this test is lower than EN14450 or EN1143-1

Test and Certification Bodies

ECBS - A world renowned German accreditation body, certifying safes, strongrooms, ATMs and security doors. They are accredited to ISO-IEC 17065

ICIM - This is an Italian certification body

LPCB - This is the Physical Security test and certification arm of BRE. BRE is a much larger, British testing and certification body with a global reputation.

SBSC - This is a Swedish certification body.

Secured by Design - This is a UK Police run initiative offering certification to multiple security products and also wider schemes

Sold Secure - This is a British test and certification body, owned and run by the Master Locksmiths Association

VDS - Leading German testing and certification facility

Trade Organisations

AiS - The Association of Insurance Surveyors is a UK body of risk control and reduction experts, who work within the insurance market

ESSA - This is a global trade organisation for Safe, Strongroom, ATM and Security Door manufacturers and distributors

BRITISH SAFE AND VAULT TRADE ASSOCIATION - BSVTA is the UK trade body for the safe industry. They promote good standards, certification and ethical practices

Eurosafe - This is the European parent organisation of BSVTA

MLA - Master Locksmiths Association is the main trade body in the UK for locksmiths

Secured by Design - This is a Police accreditation scheme for security product manufacturers and distributors

NAEP - Founded in 1997, organisation championing the appropriate care equipment in the community

...because we are the sure defence
