

Manage your keys with the
KG Intelligent Key Cabinet

Let us help solve your key problems!

iKMS Intelligent Key
Management System

Set up the controls,
parameters and monitoring
that suits your business
needs.

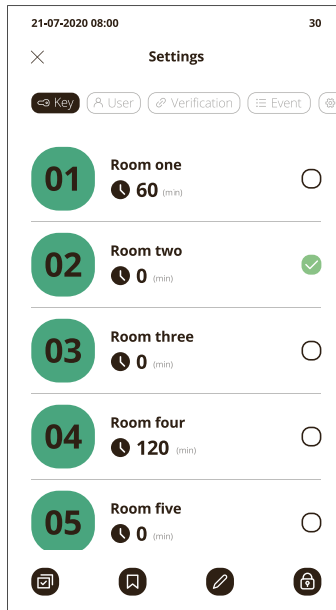

*A fantastic and **well priced** system that will manage
the access and usage of all your **important & critical** keys.*

IKMS Intelligent Key Management System

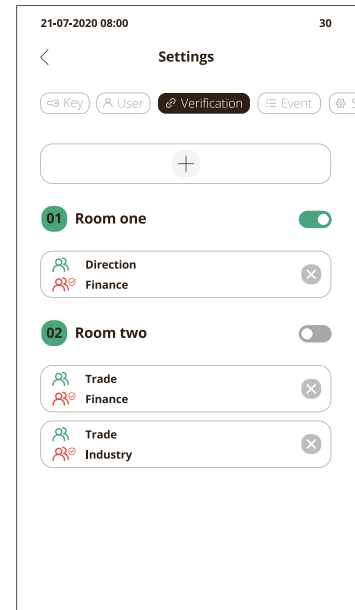

Cloud management and remote control (Optional)

See a live status of your keys

Name your keys & set rules for for their use

Create rules for users to take keys

Why is it great?

Versatility

Choose the access method to suit you from: PIN code, fingerprint, face recognition & RFID card. You can even create your own combinations to increase security.

The IKMS is highly customisable

Set up the controls, parameters and monitoring that suits your business needs.

Great price

The IKMS is highly competitive, offering affordable access control for your keys. There are no hidden add ons, no ongoing software costs, no upgrade costs. Just one simple system for all.

After Sales Support

Professional installation service and 24/7 support packages available on request

Easily link multiple cabinets onto one single account

Link an unlimited number of cabinets to a single account, with common users and unique users by site or region.

Cloud based software

Easy live monitoring of the cabinets from anywhere in the world. No need to worry about installing software on your company networks.

Simple to use out of the box system

No complicated set up process. Intuitive operation and simple software.

1 Cabinet

Sleek design that fits into multiple environments.

3 Face Recognition

Use face recognition to grant quick access to keys. Even in dark environments.

5 KeySlot Set

Key slots are complete with RFID tags, that recognise which keys are in which slots

2 Touchscreen

7 inch Touchscreen
Android system

4 Fingerprint

Access keys via the biometric fingerprint reader.

6 Lock

Full detection of the door lock status, including if the door is left open too long or forced open. Mechanical emergency opening in the event of power failure.
