EMBASSY MODULAR STEEL SECURITY WALLING

THE SURE DEFENCE

PROTECT YOUR FAMILY AND VALUED POSSESSIONS

WITH AN EMBASSY SAFE / PANIC ROOM.

With over 30 years' experience providing high security physical protection products, Burton Security can provide the best solutions to protect your family and most valuable possessions. Working with you allows us to design the highest level of bespoke safe rooms and vaults for your family to take lifesaving shelter during a robbery, burglary, home invasion or terrorist attack.

EMBASSY MODULAR STEEL SECURITY

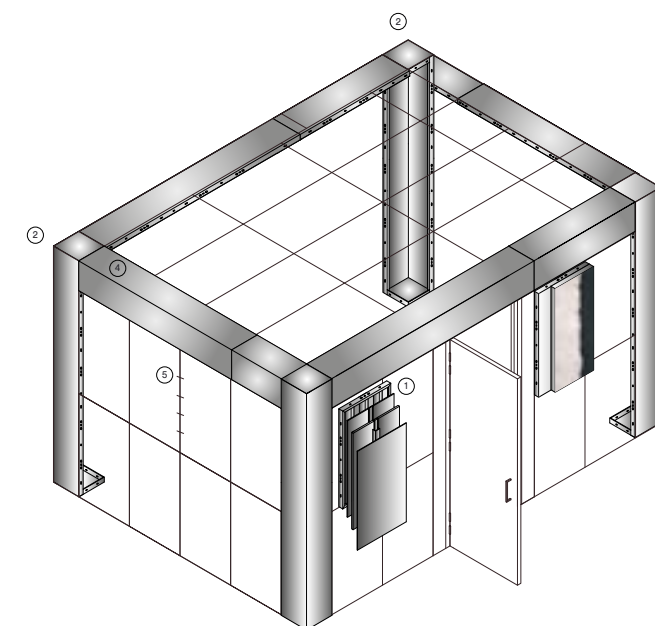

Walling

A safe room, or panic room as they are often called, provides a safe hiding place for your loved ones until your security team or the emergency services can be contacted.

Coordinating directly with your interior designer and architect ensures that we identify the protection level required to create safe rooms that are attack resistant, bullet proof, functional, safe and aesthetically pleasing.

We have a choice of security rooms and walling levels to protect against physical attack tools and ballistic weapons, such as pistols, handguns, and rifles. Additionally, our range of luxury armoured and sliding doors can be hidden from view, something that can be specified during the design process.

PRIVATE RESIDENCES, LUXURY APARTMENTS, YACHTS AND OFFICES

An Embassy safe / panic room or a vault can be built as a stand-alone room or we can discreetly convert existing areas of the home, such as bedrooms, walk in wardrobes, guest rooms, ensuites, living rooms, offices, and garages to keep your family and valuables safe from intruders.

Our designs include adjoining rooms to create a central places of safety for the family with hidden armoured doors, manual or powered sliding doors, access control and window protection such as shutters, bar sets and bulletproof glass for the highest level of protection.

Embassy panic rooms are ideal for high-net-worth individuals, dignitaries, and celebrities wanting to avoid life and death situations and protect the family in setting such as private residences, home offices, holiday homes, luxury apartments, and super yachts.

For larger ground floor installations designed to protect collections, art, classic cars, jewellery, precious metals, cash, and important documents we also have a range of strongrooms and vaults made from heavier steel and composite constructions.

High Security Doors

Armoured security doors at the property boundaries can provide an additional layer of protection and time critical safety so you can reach your panic room in safety!

Embassy Design

Enables architects and specifiers to embed secure design from the outset, creating the perfect balance of security and luxurious interior design.

Embassy modular security steel walling and rooms installed for maximum protection worldwide.

EMBASSIES, HOTELS AND SCHOOLS

In a world where the threat of terrorist attacks has become more common on Government embassies, hotels, retail areas, and sadly in schools too, the protection of personnel within safe areas of retreat has become more important to our way of living and is rightly now the everyday duty of care for many.

Our Embassy modular steel security walling is ideal for designing bespoke rooms or converting existing rooms to offer a high level of physical attack protection, ballistic resistant walling protection combined with bulletproof door sets creating the safe room required.

In these environments a well drilled emergency plan incorporating a designated, professionally designed safe room can save lives and help reduce the risk of robbery and hostage situations.

Working with your architects and designers each Embassy walling or safe room installation can be decorated discreetly to match its natural surroundings and create a hidden room or become part of a luxurious experience for clients, guests, visitors, pupils or staff.

Physical Security

Provides time delay. Delay equals safety and time to notify the Police authorities!

High Security Armoured Doors

We provide a large range of security door sets including traditionally hinged, luxury, and bespoke sliding door models!

Escape Rooms

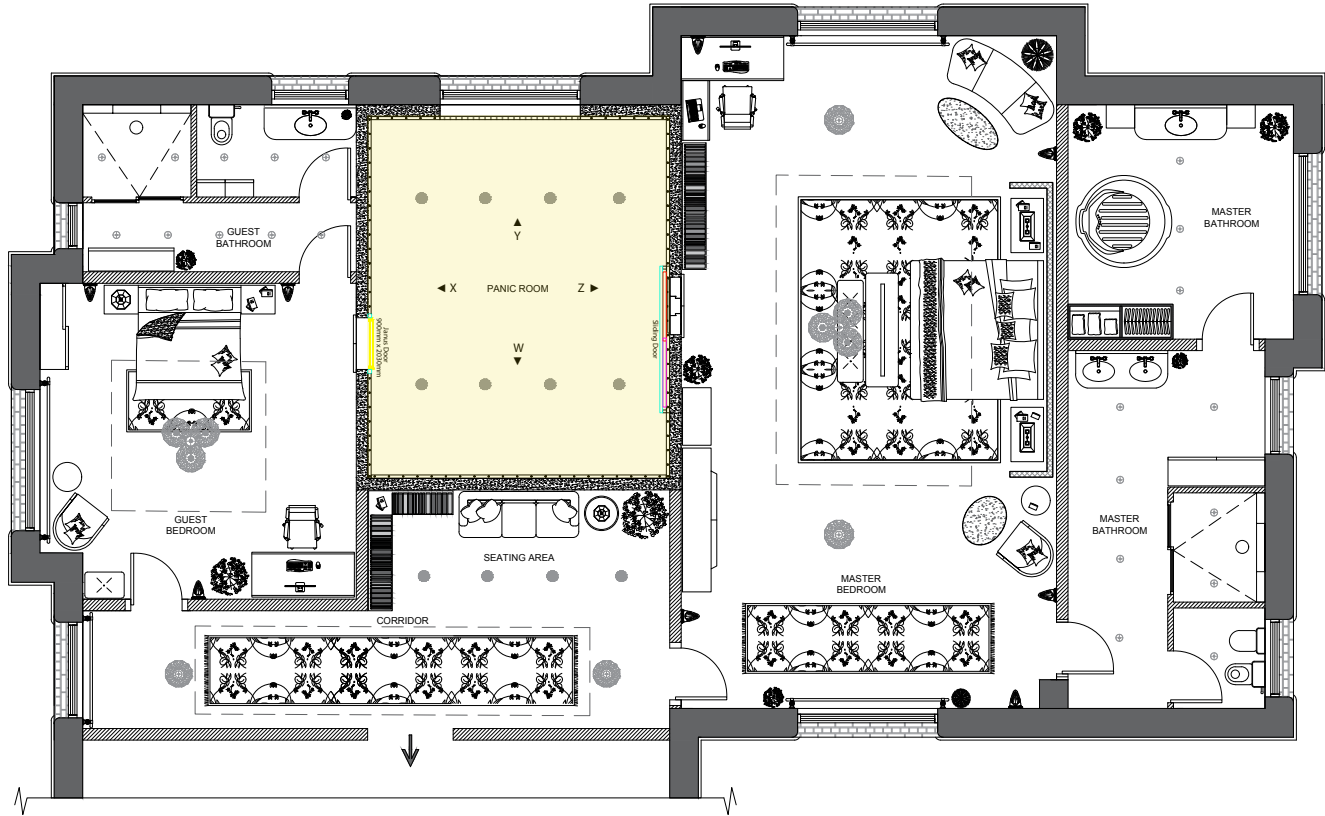

An Embassy safe room is an ideal place of retreat and safety if under attack during a robbery, aggravated burglary or assault!

ARTS & LEISURE

It has been estimated by U.S. News that more than 50,000 pieces of artwork are stolen globally each year, and that 40% of these crimes are committed in the UK. In addition to the billions of pounds worth of loss attributed to these thefts, storage vault fires have accounted for many millions more. The risk to art, film and musical history has almost never been greater as general concerns surrounding worldwide security matters continue to grow, and as the threats from terrorism and armed robbery also remain high.

Our bespoke Embassy modular steel security walling, strongrooms, portable security rooms and vault systems are ideal for designing both fixed and temporary solutions to these threats. Suitable too for the conversion of existing rooms within buildings, vehicles, and yachts, Embassy offers a high level of physical attack protection, fire protection and ballistic resistance.

Whatever your requirements, choose Embassy security rooms and doors to create the ultimate protection again burglary, robbery, fire and armed assault.

ARCHITECTS, DESIGNERS & CONTRUCTION

Embassy modular steel security walling and our high security luxurious safes are ideal for designing bespoke rooms or converting existing rooms, offering a high level of physical attack protection, ballistic resistant walling protection combined with bulletproof door sets creating the safe room required.

We carefully listen to our clients so we can fully understand their security needs, concerns and lifestyle. With a collaborative approach with our clients, their designers and architects we work to exceed expectations in all that we deliver with that personal touch which makes us unique in our approach.

Following on from your preliminary discussion to assess your security needs, now your attention can turn to the finer details to ensure your chosen safe room compliments your lifestyle. Working with your designers we can combine innovative high security solutions with architecture and interior design to create wonderful living spaces to fit in with your lifestyle, bringing everything together to create a beautiful home.

Embassy is manufactured in the United Kingdom through design, innovation and investment in British engineering. We look forward to discussing your luxury bespoke requirements with our professional team as

part of our fully comprehensive consultation. Offering our customers not only unique, bespoke safe and panic rooms but a complete range of products for your home and business that will protect your most valuable possessions.

Working with your professionals drawn from architecture, interior design, construction and project management fields we can provide an exclusive range of exquisite safes using the finest materials. All hand finished using the best British craftsmanship to give the safe your personal touch.

Ultimate
Privacy

We offer peace of mind that your security project will be discreetly designed, managed and installed by our expert UK team. Our team will ensure that everything is taken care of, from design to install we give you complete transparency and privacy.

RETAIL AND COMMERCIAL

From the world's most advanced safe deposit centres in Hong Kong, to securing cash, bullion and valuables in banks and retailers across Europe and the Middle East; the team at Burton Security have the experience to advise, design, and deliver physical security solutions to protect you, your staff and your assets.

Embassy modular steel security walling, vaults and high security doors are ideal for designing bespoke rooms or converting existing rooms to offer a high level of physical attack protection, ballistic resistance, and controlled access or fire escape.

Our security solutions and safes can be found in most high street stores, superstores, banks, safe deposit centres, and protecting high street ATM's.

Unfortunately, the current cost of living crisis has seen a huge increase in theft from supermarkets. Working with heads of security we have designed anti-theft solutions to protect the stored cash within self-checkout machines, safely prevent snatch theft shoplifting via fire escapes, supply trolleys to aid the safe transit of cash through busy stores, and the ever-important service and daily management of all types of onsite security assets.

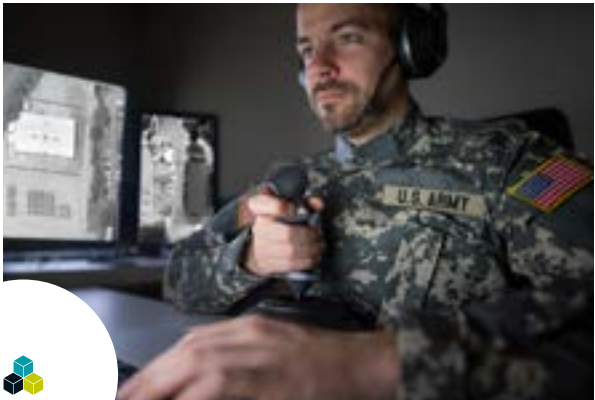

With a burgeoning reputation for providing turnkey solutions Burton Security are the perfect partner for anyone considering investing in the security of safe deposit centres, sanctuary rooms for high-net-worth individuals, cash handling areas, retail stores, bookmakers, banks, and home security too.

TECH TALK

1001.01 is a technical document that specifies the performance requirements that equipment should meet to satisfy the needs of certification and procurement bodies as well as the individual user.

We have a large range of bespoke and off the shelf solutions developed for storing guns, protecting personnel in armouries, at shooting ranges, and which provide physical security protection when threatened with a firearm.

Our modular layered approach to designing and manufacturing Embassy walling means we can apply levels of materials that are fully tested and certified to BR1 to BR7, EN1522 FSG, and EN1523 FSG standards for ballistic resistant protection.

Personnel protection for the inside of gun rooms, safe room or areas used for firing weapons can be lined with our coatings developed and fully tested at Precision Ballistics Laboratories to test procedure 1001.01 for Anti-Spall and Anti-Ricochet properties.

Embassy modular steel security walling is ideal for designing a layered approach for building secure rooms and portable rooms that can include physical security, ballistic protection and anti-ricochet protection.

For smaller or additional secure gun storage and gun collection displays we have a full range of Sold Secure tested, police preferred gun safes and high security luxury glass display safes.

Burton Security's core principle is to ensure products are tested to the highest standards. We are proud to have tested products to LPCB standards and feature in Red Book Live.

DESIGN & INNOVATION

THE SURE DEFENCE TEAM

We are proud to manufacture our Embassy modular steel security walling and safe room products here in the UK. Our growth is through design, innovation and investment in British engineering.

Each project is managed and designed in house meaning we can offer a full turnkey security solution starting with a dedicated security team of experts who will discuss your requirements and start putting your concept plans into a working design.

Our design team will then create CAD drawings to match your space and the security protection level required, followed with a quotation which will be prepared for you to review.

Once the security design project has been agreed you will be introduced to a dedicated project manager who will oversee the whole production and installation process, starting with the all-important on-site survey.

Your bespoke Embassy walling or room will then go into production at our own fabrication workshops, ready for our skilled and fully vetted safe & vault installation engineers to install on site.

Protecting People And Valuables

A free-standing high security solution of modular construction, Orthrus delivers optimum price/performance ratio. It is certified to the very latest LPS standard – LPS1175: Issue 8 and has achieved security rating F10 (SR6) G5. Each room is built to order according to the individual size and security requirements of the client. The flexibility of design and build allow this to be the perfect solution in the commercial world for high value items or indeed military/government use for sensitive materials or meeting spaces.

- Free-standing high security safe room
- Modular construction to create bespoke rooms built to your specification
- Orthrus rooms Independently tested and certified to LPS1175 (Issue 8) F10 (SR6) G5
- Built to a Police Preferred Specification -Secured by Design
- Ideal solution for creating a secure space within an existing structure
- Ideal for commercial, military and government use
- Exceeds requirements of the UK Environment Agency for the storage of radioactive source material/equipment
- Panel widths range from 150mm to 1500mm
- Rooms can be 5 or 6 sided
- Design, consultancy service and installation provided by Burton Safes
- The door and locking system can be connected to client's own alarm system and access control system
- A 2nd or 3rd lock can be added to your vault door if required
- Lock features 4 manager codes, 36 user codes, time delay and time windows, dual user functions and audit trails
- Optional emergency door, access hatch, pass through door is available

*without additional steel supports

- Independently tested and certified to EN1143-1 Grades 1 - 13
- Grades 6 - 13 have been tested and certified to EX, providing additional protection against explosives
- Grades 8 - 13 have been tested and certified to CD, providing special protection against core drills
- Insurance approved by the AiS
- Built to a Police Preferred Specification - Secured by Design
- Designed to suit your size and security requirements
- Panels can be provided in lengths of up to 3600mm and can be fitted with cable and ventilation holes if required
- Mounting plates for seismic detectors can be added to your vault
- Steel cladding for the exterior is available on request
- Burton Safes offer a full consultation, design and building service. Upon completion the room is inspected and registered with VDS
- All Cerberus doors come with 2 locks as standard and a third can be ordered on request. The locks are located on the outside only

- Cerberus doors can be supplied with key, mechanical combination or electronic locks
- Electronic locks can offer redundant systems, dual user, time delay, time lock, duress alarms, audit trails, one time codes, remote programming and tiered access rights
- All doors can only open outwards and can open 180°
- An emergency door can be integrated into the main vault door or installed as a separate door*
- A day gate can be fitted to the main vault door on request and comes with a single key lock and a second key or electric strike
- Exit handles and hydraulic closers can be added on request

Locking Options

*Integrated door in door only available on Grades 1-3

BANKING • SAFE DEPOSIT • CASH CENTRES • SECURE STORAGE

Our Vaults are unrivalled in its success, due to the modular nature of its design, and the scalable levels of security.

Elegance and security

ARMoured SECURITY DOORS

Elegance and security designed for the protection of your family and valuables.

TO BE DEFINED AS “PERFECT” A DOOR NOWADAYS MUST BE SAFE. MUST BE ABLE TO UPDATE THE MOST ADVANCED TECHNOLOGICAL LOCKING SYSTEMS.

IT MUST BE FUNCTIONAL, I.E. CAPABLE OF IMPROVING ITS SECURITY, INSULATING AND ACOUSTIC PERFORMANCE.

FINALLY, IT MUST BE ELEGANT AND CUSTOMISABLE TO RESPOND TO ANY TECHNICAL-AESTHETIC CHOICE.

All our armoured doors have been tested and certified in the laboratory to ensure maximum protection and security from break-in attempts. The ability to resist is measured through the stress with static and dynamic loads, and the simulation of burglary attempts implemented with different types of both manual and electric tools.

In some situations, in addition to protection from burglary attempts, fire protection is required. To meet these needs, we offer two models with fire resistance certification of 30 minutes (Fire 30') or 60 minutes (Fire 60').

METAL+ DOORS

AT THE HEART OF EVERY HEINEN DOOR

From the simplest to the most demanding requirements

The Heinen heavy duty, high security steel doorsets offer an unrivaled combination of performances. Options include burglary, fire, smoke, bullet & blast resistance, alongside high acoustic & thermal performance as well as options for emergency & panic escape.

The Metal+ steel doors have always remained faithful to their primary objective: to provide protection while guaranteeing stability and robustness that enable heavy-duty use of the door.

Components of the Metal+ door

- Internal tubular steel framework
- Screwed on metal sheets in galvanised or stainless steel
- Adjustable screwed on hinges for precision fitting

The winning combination for a minimal total cost

- Robustness and extreme mechanical resistance
- Very low cost of use :
simple to replace components + low maintenance
- Combining high performance features
- 10 or 15 years warranty defined by the installation method

Components of the Metal+ Door

Metal+ Doors have the following basic performance features

- 1 Frame (steel sheet 15/10 or 20/10) covering the thickness of the reveal for an attractive finish (with optional thermal break).
- 2 Double lip seal.
- 3 Insulation around the edges of the door (with intumescent material for fire doors).
- 4 Tubular steel structure (60 x 60 x 2 mm).
- 5 Door skin comprising 15/10 galvanised steel sheet screwed into the tubular structure and individually replaceable.
- 6 Self-lubricating hinges, adjustable and replaceable, screwed into the tubular door structure.
- 7 Hyper-strong synthetic material (for optimum protection of the insulation or intumescent material incorporated into the door leaf).

Combining bespoke performance features

Heinen doors can combine performance features on a bespoke basis. Depending on your needs, one or more performance features are added to the basic, robust METAL+ door.

PANZER BLAST PROOF DOORS BT

Dual
Locking

Pin

Biometric

Dial

**Our mission is the protection of persons and facilities.
For this purpose we develop and manufacture blast doors and blast equipment in different versions.
The commitment to design and technical precision was instrumental for our company success.**

Panzer Blast Proof Doors BT built in highly efficient design by means mixture of high-quality steel and reinforced concrete.

The BT1, BT2 and BT3 are swing doors with lateral hinges to allow opening from in-and outside.

The doors are tested in the laboratories under real conditions and Simulated calculation by LS-Dyna and certified that they resists a shockwave from up to 9 bar/130 psi till a explosion pressure (reflected pressure) up to 28 bar/406 psi.

The doors can be equipped with an additional emergency door which is operated from both sides.

- Minimal weight increase with panels at just 1 - 1.5kg/pm2
- Easy to apply, and install
- Can be installed as part of manufacture or as a retro fit solution
- 4 different security levels to suit your security needs

Avertic Armour

Avertic Armour is a highly advanced, state of the art security panel providing ultra-light and effective protection against a range of power tools. It's unique properties allow it to be used across many security solutions such as cash-in-transit vehicles, panic room construction, military out buildings, secure room dividers, roller shutters and many more.

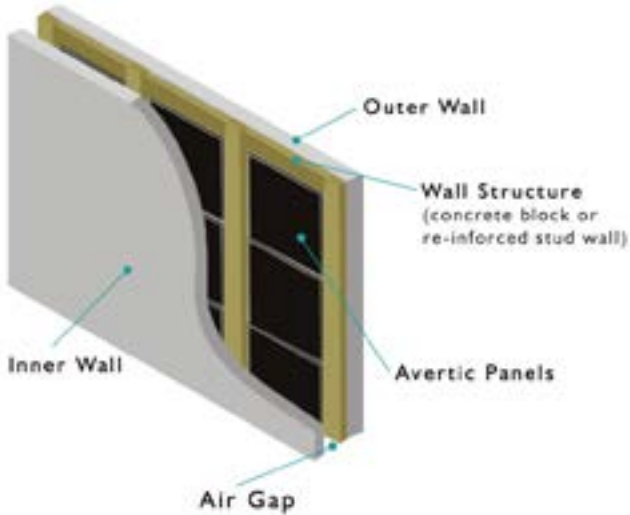

Example of vehicle panel construction

Example of secure room wall construction

The Avertic Armour Panel is available in 4 different security levels:

- Anti-Drill**
Contains 8 layers of protective material and provides 18V drill protection
- Power**
Contains 6 layers of protective material and 2 layers of the anti-cut material. It can provide protection against a concrete cutter, chainsaw and 800w grinder
- Power +**
Contains 4 layers of protective material and 4 layers of the anti-cut material. This product protects against a 1100W grinder, reciprocating saw, concrete cutter and chainsaws
- Extreme**
The most secure level of this product, contains 2 layers of protective material and 6 layers of the anti-cut material. This level protects against a 2300W grinder, reciprocating saw, concrete cutter and chainsaws

Tailored versions are available to suit security requirements

Safes and Secure Storage

High Security Safes

From £100k jewellery rating to Europe's Highest security safe providing £2.5M jewellery rating; all of our high security products are independently tested and certified by internationally recognised test houses and validated by the Association of Insurance Surveyors.

At Burton Safes we work on some of the world's most secure sites. That experience filters into our products and the benefits reach you. Our range contains models with features such as double walled steel products with ultra-high performance concrete, certified fire protection, relocking devices, glass plates, and special drill protective elements for the lock and bolt work.

We deliver key and electronic locking solutions, including the use of the latest biometric technology.

Our locking solutions include features such as alarm and CCTV integration, dual user entry, time delays and windows, duress codes, temporary and one user time codes to name a few. We also have a wide range of optional extras to provide for every eventuality, whether that be jewellery inserts or additional shelves.

BESPOKE SECURITY SOLUTIONS

Contact our commercial team
+44 (0) 1484 663388
enquiries@burtonsecurity.com

Although Burton Security offers an extensive range of tested and certified safes, vaults and physical security products, our R&D and engineering

side of the business have the capability to provide made to measure bespoke security solutions to meet the most demanding of projects.

STANDARDS

The Sure Defence

All strongrooms certified to EN1143 must have a certified lock that reflects the grade of the solution

- Strongrooms certified to EN1143-1 Grade XI and XII must have 3 locks certified to Class C or 2 locks certified to Class D
- Strongrooms certified to EN1143-1 Grade XIII must have 2 locks certified to Class D

The standards below can be found in our Sure Defence ranges:

LPS1175 - This is an independent standard published by BRE. It can be applied to products used to form all layers of physical security, including the perimeter (e.g. fences and gates), building fabric (e.g. doors, windows, shutters and walling), enclosures and cabinets. Issue 8 defines eight levels of threat (A to H) and six levels of delay (1, 3, 5, 10, 15 and 20 minutes).

EN1627 - This is a European burglary attack test standard for security doors. There are 6 security levels from RC1 - RC6

EN1063 - This is a bullet resistance test for glass. There are 7 levels from BR1 - BR7

EN1522 - This is a bullet resistance test for doors and systems. There are 7 levels from FB1 - FB7. All parts of the door are tested, including door furniture, frames and joints

LPCB EXPLAINED

LPCB certification is recognised by insurers, consultants, architects and risk managers across the globe.

Products that are tested to LPCB standards can reduce liability for our customers because of the demonstrated due diligence that having a product certified provides.

Products are rigorously assessed in order to achieve certification. Testing and evaluation makes up an early part of the process, followed by auditing the factory production to ensure high standards are maintained.

Once the product is successfully certified, it is then listed on [RedBookLive](#). It is here that our products are seen by specifiers to verify the status of our tested products.

Once a product has been certified, continuous audits are carried out to ensure that certification is maintained.
