side of the business have the capability to provide made to measure bespoke security solutions to meet the most demanding of projects.

# STANDARDS

## The Sure Defence

All strongrooms certified to EN1143 must have a certified lock that reflects the grade of the solution

- Strongrooms certified to EN1143-1 Grade XI and XII must have 3 locks certified to Class C or 2 locks certified to Class D
- Strongrooms certified to EN1143-1 Grade XIII must have 2 locks certified to Class D

The standards below can be found in our Sure Defence ranges:

**LPS1175** - This is an independent standard published by BRE. It can be applied to products used to form all layers of physical security, including the perimeter (e.g. fences and gates), building fabric (e.g. doors, windows, shutters and walling), enclosures and cabinets. Issue 8 defines eight levels of threat (A to H) and six levels of delay (1, 3, 5, 10, 15 and 20 minutes).

**EN1627** - This is a European burglary attack test standard for security doors. There are 6 security levels from RC1 - RC6

**EN1063** - This is a bullet resistance test for glass. There are 7 levels from BR1 - BR7

**EN1522** - This is a bullet resistance test for doors and systems. There are 7 levels from FB1 - FB7. All parts of the door are tested, including door furniture, frames and joints

## LPCB EXPLAINED

LPCB certification is recognised by insurers, consultants, architects and risk managers across the globe.

Products that are tested to LPCB standards can reduce liability for our customers because of the demonstrated due diligence that having a product certified provides.

Products are rigorously assessed in order to achieve certification. Testing and evaluation makes up an early part of the process, followed by auditing the factory production to ensure high standards are maintained.

Once the product is successfully certified, it is then listed on [RedBookLive](#). It is here that our products are seen by specifiers to verify the status of our tested products.

Once a product has been certified, continuous audits are carried out to ensure that certification is maintained.

Product	Standard	Rating	Certification
<b>PANIC ROOMS AND WALLING</b>			
Embassy Panic Rooms	-	-	-
Talos	LPS1175 Issue 6	SR2, SR3 and SR4	LPCB
Avertic	-	-	-
